CIRCULAR

Sub: Special Terms & Conditions of the contract for Electrical Works.

In a review meeting taken by the Managing Director, out of the other issues, one of the issue related to tender document for electrical works had come up. In this regard it was observed that, for two bid tendering system, we are making binding the interested agencies/ bidders on certain special conditions, which are related to mode of payments against the material supply, material testing, responsibility of the contractors towards getting the system energized through the DISCOM and handing over the system in working conditions etc. However, these special conditions are not being enforced on the contractor when the tendering process is of the category of single bidding system.

During the review meeting, it was considered of importance that irrespective of the tendering system (two bids or single bid) or cost of the work, these special conditions need to be enforced for timely and effective utilization of the expenditure and also to regulate running payments and other administrative and technical obligations on the part of the contractor in execution of the works.

In view of the above, a document containing special terms and conditions of the contract for electrical works has been finalized as enclosed with this circular. This document henceforth needs to be appended to every tender document related to the electrical works of the Corporation, including street lighting works, irrespective of the cost of the work or the tender system (single bid or two bids). Accordingly the contractor/ agency so selected through the tendering process will observe all these terms and conditions for execution of the awarded works besides the routine terms and conditions/ clauses etc. of the work order and the contract agreement etc.

The enclosed document is being circulated to all the concerned for making compliance as above.

This is bears concurrence of Financial Advisor and approval of Managing Director.

Suptd. Engineer (Power) 01/01/14
