9. The drain plug of brass should be fitted in such a way as to completely drain the water from the tank. Suitable details of the arrangement can be given in the tender.
10. The Tenderers are required to give satisfactory type test certificate of the air coolers as per IS 3315/74 amendment No. 1 to 6 alongwith their offer.
11. The Tenderers should confirm that the type test certificate of the pump, switch, exhaust fan or fan motor will be made available to the inspector at the time of inspection.
12. The air cooler offered for inspection will normally be subject to routine test and acceptance test as per the following sampling plan. However, sampling can be modified at the description of the inspection authority nominated by the Corporation. The inspection charges of inspection authority like DGS & D shall be borne by the approved supplier.

Lot sizes	No. of samples
01-10	3
11-20	5
21-30	8
31-40	10
41-50	12

13. Noise level of air coolers shall be declared when measured on sound level metre on a scale at a distance of one metre from the air drill in the stream of air flow. Background noise level shall also be stated (at which noise level has been measured and declared). Water pump shall also be ON with water tank full of water when reading are taken. The above declared value shall be checked by the inspector at the time of inspection. Availability of noise level metre shall specifically be confirmed by the Tenderers failing which offer is liable to be ignored.

14. Maximum power consumption under zero static condition shall not exceed the following figures and no positive tolerance shall be allowed on this maximum power consumption at normal running conditions shall be declared.

3000 cum/hr	250 watts
4000 cum/hr.	280 watts
5000 cum/hr.	350 watts

15. Service value expressed as minimum guaranteed capacity per unit of power consumption shall be declared by the Tenderers.

16. Evaporative air cooler shall provided with front filling arrangement.

17. Availability of testing facilities including zero static testing facilities shall be confirmed at Tenderers work or with sister concerned preferably within one K.M. distance. In the latte case complete details are to be furnished.

18. Power consumption test.

Each unit of a given lot shall be tested for power consumption test at mia free air fow conditions. This power consumption figure would not exceed the value arrived at by subtracting differential 'D' from the maximum permissible power consumption at zero static pressure test conditions ass given in 5.3. Differential ;D; would be the difference between the actual power consumption observed at zero static pressure test conditions of an air cooler selected at random from the givene lot and the actual power consumption of the same air coolers at free air flow conditions. If more than one air coolers are tested at zero static pressure conditions, then, maximum observed differential would be subtracted from maximum permissible wattage at zero static pressure test conditions for arriving at acceptable value of power input for air coolers at free air flow conditions.

19. **NOTES FOR TENDERERS**

Noise level and service value declaration are required for guidance of consignees for making proper selection in view of the Government endeavor for energy conservation and to reduce pollution due to noise non declaration of these figures may result in offers being ignored.

20. The coolers shall be guaranteed free from defects in material and workmanship for one year from the date of purchase.
